MRA-DUO

Total Control® Auxiliary Base Station

OVERVIEW

The URC MRA-DUO is a compact and versatile auxiliary base station designed to bring sophisticated control to any room. Built on the proven architecture of the MRX-4IR platform, the MRA-DUO provides a reliable, high-performance solution for controlling devices through both **Bluetooth® wireless technology** and Infrared (IR), without the bulk. But the features don't stop there! Now, direct Voice Control Integration with select streaming devices is also available when using compatible URC devices such as the TDC-5100, TRC-1120, TRC-1480, and others!

- Compact base station controls up to four IR devices and select Bluetooth devices
- Seamlessly integrates with TVs, projectors, soundbars, streaming devices, and more
- Voice Control over Bluetooth for select devices*
- Connects to the network via Wi-Fi or wired LAN
- Compatible with Total Control Accelerator 3 and Total Control Flex 2 programming platforms
- Ideal for spaces where large base stations or CAT5 cabling are not practical
- Requires a Total Control primary controller for operation

* Reference product information in Accelerator for a current list of devices.
